Amendments to the Specification

Please amend the specification of the above-identified application, as follows. In accordance with current amendment practice, changes are shown by underlining (for added matter) and strikethrough (for deleted matter), with the exception that double brackets are used to indicate deleted matter when strikethrough cannot be easily perceived.

Amend paragraph [0002], page 1, as follows:

[0002] "Apparatus And Method For Automatic And Customizable Generation Of Objects In A Distributed Object Relational System", Serial No. 09/544,273, filed April 6, 2000, abandoned January 27, 2003; and

Amend paragraph [0003], page 1, as follows:

[0003] "Process And System For A Client Object To Perform A Remote Method Invocation Of A Method In A Server Object", Serial No. 09/259,141, filed February 26, 1999, abandoned March 10, 2004.

Amend paragraph [0036], page 11, as follows:

[0036]   Often, object-oriented programs, such as those written in Java or other object-oriented languages, desire to call one or more objects, such as Common Object Model (COM) objects. In some instances, however, like with Java, the low-level interfaces of COM are much different than the interfaces of the Java program (i.e., they have different object models). Thus, a collection of methods serve as an intermediary between the Java program and the COM object. In one example, this intermediary is referred to as Bridge2Java, which is offered by International Business Machines Corporation, Armonk, New York ~~at http://www.alphaworks.ibm.com. Information regarding Bridge2Java at this URL is hereby incorporated herein by reference in its entirety~~.
